TABLE OF CONTENTS

VOL. 19 NO. 6

» As a TAPPI member, you receive access to all *TAPPI Journal* research or you can download individual papers for a minimal charge. For more information, visit www.tappijournal.org.

- 277 EDITORIAL**
Fifty years with TAPPI: A personal and professional perspective
Bruce Lyne
- 281 PAPERMAKING**
Cationic emulsions of maleic anhydride derivatives of oleic acid and abietic acid for hydrophobic sizing of paper
Ahsen Ezel Bildik Dal, Martin A. Hubbe, and Lokendra Pal
- 293 PULPING**
Development of a fast brightness testing method for mechanical pulp based on microwave oven drying
Xiaohan Wang, Yanqun Su, Jingang Liu, Zhibin He, and Yonghao Ni
- 303 RECOVERY CYCLE**
Integrated study of flue gas flow and superheating process in a recovery boiler using computational fluid dynamics and 1D-process modeling
Kunal Kumar, Viljami Maakala, and Ville Vuorinen
- 317 TECHINCAL BRIEF: POWER & ENERGY**
Case study: Paper mill power plant optimization—balancing steam venting with mill demand
Ricardo B. Santos and Peter W. Hart

»COVER CREDIT: Researchers Kumar, Maakala, and Vuorinen present an integrated modeling approach that provides a novel and comprehensive way to improve and optimize the design of superheaters in recovery boilers (p. 303). Shown here are the solved velocity field for flue gas in the superheater region of a recovery boiler (top and bottom images) and the solved temperature field for the flue gas in the superheater region (middle image), with all figures taken from the middle of the recovery boiler width.
